Refurbishment Single Deck Intercity Trains – Holland

Project Start:

2003

Number of cars:

461

Scope of supply:

- Intercommunication doors
- Vestibule area
- Partitions

Project description:

The Intercity Materieel or ICM (English – Intercity Material or Intercity Rolling Stock) is an electric multiple unit (EMU) train type operated by the Nederlandse Spoorwegen in the Netherlands. The train got the nickname Koploper, because it had a so-called "walk through head". After these trains were modernised, the "walk through heads" were removed. The modernised train sets are referred to as Intercity Materieel Modern (ICMm).
